

Historia

It's hard to ski when you can't see

The odds of injury are 3x higher during poor visibility

Like you, we live for fresh powder and epic days on the slopes. And we got fed up with cancelling plans and struggling out there due to bad visibility.

PROVUU was built out of a simple question: Can't technology fix this? After years of research, development and prototyping, the answer is yes.

Meet the PROVUU XR Goggles

PROVUU augmented reality snow goggles offer enhanced visibility in all conditions, from shadow or cloud to snowy weather. Have the slopes to yourself with augmented contrast for clear visibility.

Winner 2025 Outdoor Brandnew Award

Each year, over 2000 outdoor & winter sports companies come together exhibiting the latest products at ISPO. A jury of industry experts select the most promising new technologies for the Brandnew Awards. It's the biggest startup competition in the sports business. Past winners include companies like GoPro and On.

Key Features

VIEW-XR™

PROVVU's real-time AR enhanced visibility **increases contrast by 75% & visual range up to 5x**

Safe by design

See clearly what's ahead without blocking peripheral vision. Fully transparent when VIEW-XR is not active

Button switch

Easy to use button switches VIEW-XR off for those blue sky moments, or turns on enhanced visibility whenever you need it. **Record video clips and share the action**

Designed for the outdoors

High tech but lightweight, **less than 100g additional weight** compared to standard goggles. The detachable handheld unit with rechargeable battery stows in pocket. This helps protect battery and electronics from damage and extreme temperatures.

What you'll receive

Backers for pre-order of the XR Goggles will receive a complete set:

- XR Goggles,
- handheld unit with rechargeable batteries,
- and detachable cable.
- 📄 Holiday gift certificate (printable PDF to give a snow lover in your live)

Expected delivery of pre-orders to backers starting by October 2026 in time for the winter season.

About PROVUU

Inspiration can sometimes knock you directly on the head. Such was the case one day carving downhill in a hanging fog, when a wipe out from a hidden mogul resulted in a concussion. As a group of friends and engineers passionate about the outdoors, we set out to uncover the hidden terrain beneath our feet.

This is why we founded PROVUU, a startup based in Switzerland creating outdoor wearable technology. We create technology for riders who never want weather to cut their day short.

Supported & Developed Together with Experts

"Skiing is magical, until clouds roll in and visibility disappears. What was pure joy becomes risk and frustration. Provuu changes that. With enhanced visibility in fog, snow, or flat light, you can ride confidently in any weather. It's a game changer for the entire skiing industry." - **Gilles Roulin**
